

## **BILLING TOOLKITS**

### **NEW Billing & Reimbursement Toolkit**

Region I STD-Related Reproductive Health Training and Technical Assistance Center (STD TAC)  
This toolkit is designed to help publicly-funded STD clinics and public health laboratories make decisions about whether to bill, and how to develop billing systems, manage revenue cycles, initiate contracts, and enhance coding capacity. Modules are organized by topic and may be used sequentially or individually.

### **Shifting to Third-Party Billing Practices for Public Health STD Services: Policy Context and Case Studies**

[National Coalition of STD Directors](#) (NCSD)

The National Coalition of STD Directors (NCSD) has collaborated with key partners to develop a resource to support the sustained delivery of STD services in the face of a changing funding and policy landscape. This guide seeks to meet the needs of a range of providers, serving not as a technical manual, but rather an introduction to what providers need to consider as they approach the decisions surrounding third-party billing.

### **Billing for Clinical Services Toolkit**

[National Association of County and City Health Officials](#) (NACCHO)

NACCHO was funded by the Centers for Disease Control and Prevention (CDC) to create a toolkit with resources, templates, and tools for local health departments to use and develop capacity to bill third party payers for immunization, STD, TB and HIV services. More than 200 resources have currently been collected from state billing guides, the Centers for Medicare and Medicaid Services, state health departments, local health departments, insurance companies, and vendors of products such as electronic medical records and billing clearinghouses.

### **Public Health Billing Resource Manual, June 2012**
